

FROM BEAST TO BEAUTY

If you know anything about us by now, it's that we like to help people Get Noticed. There's nothing more attention-grabbing than an attractive, well-built sign. But you know what else can get you noticed? Having an ugly, faded or decaying sign. This is unquestionably the wrong kind of attention for any business, and is arguably worse than having no sign at all.

Whether due to wind, rain, snow or Father Time, eventually every sign is going to be in need of a little TLC. We have decades of experience restoring signs to their former glory. In addition to purely cosmetic restoration, we also offer options to upgrade and augment out-of-date signs such as converting to energy efficient LED lighting, or adding an electronic messaging board. If you think your sign might be in need of a face lift, give us a call today and we'd be happy to get you a quote so your sign can be on its way to looking its absolute best in no time.
