

BIGGER IS BETTER

When it comes to printing, we believe bigger is better... which is why we specialize in wide format printing.

A wide format printer is any printer with a maximum roll width of between 18 and 120 inches - much larger than your typical office printer. An economical choice for short-run projects, wide format printing is often used to produce posters, wallpaper or murals, maps, diagrams and charts, store displays, trade show or promotional signage, banners and much more.

But wide format printing isn't just paper. We can print on a wide variety of substrates: acrylic, PVC, foamcore, alupanel, and vinyl are just some of the materials we can print on. Using these materials together in various combinations allows for greater flexibility in building and pricing your project. Maybe you're not sure what product is best for your project, don't worry! Our experienced staff is here to advise you. If you can think it, we can print it - give us a call today with your ideas and we'll help you Get Noticed.
