

A REAL GLASS ACT

Here at the Sign Center applying vinyl to glass is one of our specialties. We deal with all kinds of windows: interior, exterior, small, tall, old or sparkling new. If you have glass, we can cover it with vinyl. Of course, not all situations call for full coverage; there are various reasons for applying vinyl to glass - the main three being Branding, Privacy and Safety.

Branding is the most obvious - you're looking to get your name, logo or other info out there so why not take advantage of your glass as an area for exposure?

Privacy is another important consideration - glass is modern and looks great but can be too open. We've got loads of treatment options available to add privacy while keeping the light & bright look glass provides - if you can think it we can print it on vinyl.

Safety is the most overlooked of the three. Have you ever "run into" a piece of glass so clean you didn't even know it was there? The addition of distraction marks can save your clients from broken noses and bruised egos!

If you have glass that needs a little something extra, call us today. We're happy to talk glass and work with you to create a design that will get you noticed!
